**Anti-floating
color flowers
dispersant**

Product introduction

Anti-floating color hair moisturizing agent

Chemical composition

Unsaturated carboxylic acid and silicone solution

Features benefits

1. To prevent and improve the titanium dioxide and other pigments floating color phenomenon;
2. Reduce the anti-precipitation effect of pigment deposition;
3. Maintain good dispersion stability.

Recommended use

1. Alkyd, polyester, polyurethane and epoxy systems;
2. General industrial paint system;
3. General oily ink.

Recommended dosage (100% active content)

| | |
|--------------------|--------|
| Inorganic pigments | 0.5-3% |
| Organic pigments | 2-5% |

Technical data

| | |
|---------------------------------|-----------------------------|
| Active Ingredients: | 50±2% |
| Color (Gardner): | ≤9 |
| Density (g / cm ³): | 0.89 |
| Exterior: | Yellow brown viscous liquid |

Processing guidance

1. First, the product is uniformly dissolved in the grinding base material;
2. Then add the pigment to disperse evenly after grinding;
3. Can also add anti-floating color, the amount of the total amount of paint 0.2-1.5%.

Storage and transportation

1. Cool and dry and ventilated, below 60 °C, not close to the fire;
2. The shelf life of the sealed container is three years.

Package

25 kg or 200 kg drums.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
